High-speed internet access coming to East Texas

Signalnet Broadband to provide high-speed internet access to Pittsburg residents.

PITTSBURG, TX: Signalnet Broadband is proud to announce high-speed internet access to Pittsburg residents. While major carriers, cable and satellite providers compete to satisfy consumers' insatiable thirst for data services, much of the rural areas have been left behind. Over the next few years, Signalnet Broadband will partner with nearby cities and municipalities to make high-speed internet available to those residents struggling to get high quality broadband services.

Signalnet Broadband is committed to providing lightning fast internet speed for streaming shows, movies, and the high speed, low latency connection you need for excellent gaming.

Owned and operated in the Lone Star State, Signalnet believes in investing in more than communication infrastructure. We know people make the real impact in our communities, so our organization and employees proudly support those that are working to move our local community forward.

Signalnet Broadband is offering new residential customers an exclusive price with internet packages starting at \$39.99. We encourage residents to take advantage of this yearly savings of \$240.00. This exclusive offer ends March 25th, 2020.
